

AUTO-STRAP

Fully Automated Strapping Solution

» **AUTO-STRAP**
» *Fully Automated Strapping Solution*

Auto-Strap is the fast and easy strapping system which can be combined with Autefa Lift-Box-Compact or Nonstop-Ultra balers to fasten the manual operation in case the packing is still done by operators.

It is as well an option for a strapping process direct on the fiber and a film packing afterwards by the Autefa Ad-Wrap technology.

The Auto-Strap is a solution for Autefa balers and upgrades as well every other double box baler.

SPECIAL FEATURES:

- 5 – 62 bales/h
- Can be integrated in Lift-Box-Compact or Nonstop-Ultra balers as automatic strapping system
- Useful for PE- Straps
- Welding connection by heating system (temperature controlled)
- No dust or abrasion of the strapping belts due to the heat melt technology
- Available as hanging or ground driven solution

SPECIFIC ADVANTAGES:

- Slim and cost optimized
- Less space requirement
